

57. A method for detecting metalloproteinase inhibitor in a biological sample, comprising
contacting an antibody specifically binding to metalloproteinase inhibitor with said biological sample; and
measuring the binding of the antibody to metalloproteinase inhibitor.
58. The method according to claim 57, wherein the antibody comprises a detectable label.
59. The method according to claim 57, wherein the antibody is a monoclonal antibody.
60. The method according to claim 57, wherein the method is a radioimmunoassay.
61. The method according to claim 57, wherein the method is a enzyme-linked immunoassay.
62. The method according to claim 57, wherein the metalloproteinase inhibitor is a human metalloproteinase inhibitor.
63. The method according to claim 57, wherein the biological sample is selected from a tissue, serum, and urine.
64. The method according to claim 57, wherein the biological sample is a tumor.
65. A kit for detecting metalloproteinase inhibitor in a biological sample comprising an antibody specifically binding to metalloproteinase inhibitor.
66. The kit according to claim 65, wherein the antibody comprises a detectable label.
